Cloud computing is quickly becoming the preferred software platform for many of today's fashion companies. By eliminating the traditional requirements for upfront software purchase, new system hardware, and massive IT resources, **RLM Apparel Software** enables apparel, footwear, and accessories companies to adopt the technology they need and achieve the speed-to-benefit they require in this time-compressed and cost-sensitive industry.

By combining this state-of-the-industry cloud technology with simple, proven deployment methodology, RLM has the ability to get you up and running in a fraction of the cost and time of traditional ERP and PLM systems.

Delivering cloud-based, fashion-ready business solutions for more than a decade, RLM is uniquely qualified to help your business achieve the business improvements your company needs to become more responsive and competitive. Only RLM has the proven solutions and industry expertise needed to ensure your success in the cloud.

With cloud-based deployments at businesses ranging from \$15 million to more than \$500 million, **RLM Apparel Software** is proven scalable to meet the current and future needs of any fashion enterprise. Unlike systems that lock you into the initial configuration, our solutions offer you the flexibility to make changes on the fly, at the end of each season, or whenever you need. Our unique seasonality management capabilities give you the flexibility to change your reports, style configuration, and personalize many other aspects of your system to meet the needs of each new season.

Need a system that is secure and reliable? Want easy access from remote offices, showrooms, overseas factories, remote sales teams and other locations? **RLM Apparel Software** assures that your system is always on, secure, and supported by reliable industry professionals. Leveraging leading-edge cloud technology, full system backups are always available to restore all your important information should it ever be necessary. In fact, the cloud-based **RLM Apparel Software** provides greater reliability, security, and recovery capabilities than your current on-premise business system.
