Latest *FashionManager* Enhancements Add Significant Time-Saving Capabilities

RLM Apparel Software has released a third group of system-wide enhancements for the FashionManager™ concept-to-consumer solution in as many months.

These developments add significant new capabilities to save clients time and improve control over financial management, procurement, order fulfillment and EDI processes.

The latest round of system improvements include:

- Additional Field Options in Chart of Accounts
- Interface with Capital Business Credit Factoring
- Auto-Calculate Outlet Pricing Based on MSRP
- Remittance Processing Using Lock Box Master
- Default GL Accounts into General Purchasing Screen
- Import Sales Orders via Excel® Spreadsheet
- Provision to Reserve Customer Orders
- Proforma Invoice/Approval for Shipping
- Automate Fulfillment for Neiman Marcus Drop Ship
- GXS™ API Integration for Real-time Catalog Updates

FashionManager clients are encouraged to contact their RLM Customer Service Representative with any questions regarding the new release and features.
